

Essential stove service / maintenance check-list

Check the condition and function of the following stove parts. Adjust, clean, repair or replace as necessary. Remember, during the heating season your stove will need some routine maintenance.

Always refer to the stove manufacturer's instructions.

Also check:

- Register / closure plate
- Chimney cowl
- Carbon monoxide (CO) alarm
- Air supply 'air brick'

Routine maintenance

Inspect baffle and flue way, clean if necessary. Also check air-tightness of door seal and check fire bricks and fire grate

Stove model shown is the Hi-Flame Graphite 5
